## Overview

With 40 years of experience in the life sciences, Dr. Richard Emmons, Co-Chair of Day Pitney's Patent Prosecution and Counseling practice group, combines his scientific and legal experience to play a strategic role for his clients in guiding patent strategy, managing patent portfolios, and de-risking investments. Trained in bioinformatics, cell biology, classical and molecular genetics, epigenetics, genetic engineering, immunology, molecular biology, and physiology at Washington University School of Medicine, where he earned a Ph.D. in Developmental Biology, and the Harvard Medical School, where he completed a post-doctoral fellowship, he works with companies across all areas of life sciences, including Artificial Intelligence and medical device. He has conducted extensive IP due diligence for companies, family offices, and investors at all stages. Dr. Emmons is known for creative, holistic, and strategic thinking that integrates his multi-disciplinary experience to produce business-savvy solutions.

Dr. Emmons has significant experience in life sciences, chemistry, medical device, IoT, automotive, and clean technology, allowing him to provide creative solutions and practical business advice in a variety of industries. His practice focuses on global patent strategy, IP portfolio creation and management, patent application preparation and prosecution, freedom-to-operate analysis, opinion work, inter partes and post-grant review (IPR/PGR), and complex landscape searches.

Dr. Emmons leads and conducts due diligence for private and public companies, family offices, and investors. He has also worked on mergers & acquisitions and due diligence for private equity firms and hedge funds. He also works with family offices interested in investing in early-stage high-tech and biotech companies.

His practice includes assessing freedom-to-operate positions and rendering patentability and invalidity opinions. He advises clients on entering competitive markets and third-party challenges. Dr. Emmons has worked on patent litigations, inter partes reviews, and post-grant reviews.

Dr. Emmons has worked on diverse technical areas, including ag-tech, antibodies, automotive, biofuels, biologics, cell therapy, diagnostics, digital twins, enzymes, gene editing, gene therapy, GIS, gut microbiome, immunoncology, IoT, medical device, microbial engineering, neurodegenerative disease, nucleic acid therapy, nutraceuticals, protein engineering, regenerative medicine, stem cells, and vaccines.
