Patently Enabled December 2024 – Foreign Patents, Part I: Alternative Methods For Seeking European Protection

The purpose of this monthly series *Patently Enabled* is to share simplified patent-related information to assist non-patent practitioners in making the best decisions when considering their intellectual property rights.

In the December edition of *Patently Enabled*, George Chaclas and Emily Ferriter Russo discuss the single patent application offered by the European Patent Office (EPO). This is the first part in a series highlighting strategies to reduce the cost and complexity of international patent protection.

For any patent-related comments, questions or other inquiries, please contact registered patent attorney George Chaclas.
