OVERVIEW

Anthony Kassas has assisted individuals, startups and established companies to develop and manage their patent portfolios through strategic counseling, due diligence and patent prosecution. When advising clients, he leverages his engineering and legal know-how to systematically achieve favorable results.

Anthony has extensive experience helping inventors obtain patents in cutting-edge technology spaces, with a particular emphasis on radar; optical components; lasers; sensors; computer software and networking; artificial intelligence and neural networks; vehicle systems and components; aeronautical modalities; fuel cells; fluid networks; chemical reactors and process controls; renewable energy systems; robotics; semiconductor equipment and handling; materials; medical devices; biotechnology; and mechanical and electrical devices.

Further, Anthony's prosecution experience extends into strategic counseling; due diligence work; and infringement, validity, patentability, and freedom to operate opinion endeavors.
